

# Who will you nominate for the Wim van der Hoek Award 2021?

## Submission before 10 September

Please send the following information about the nominee to [info@dspe.nl](mailto:info@dspe.nl):

1. Digital copy of their graduation report
2. Profile of the nominee, including a description of his/her skills and personality (max. 250 words).
3. Personal email address and phonenumber of the nominee.
4. Passport photo in colour of the nominee.

Please explain clearly what we may and may not mention in DSPE's communications. Points 2 and 4 are used for announcing the nominee through various communication channels.

After the assessment you will get a confirmation of acceptance and we ask the nominees to provide input for a poster that we prepare and that will be given a nice place in a gallery of honor at the Precision Fair 2021. After the Fair the nominee can take the poster with him.

At [www.dspe.nl](http://www.dspe.nl) you can read more about previous winners and what the jury is looking for.

## Presentation

The ceremony for the Wim van der Hoek Design Engineer Prize 2021 will take place on Thursday, 11 November, 2021,

On the left chairman of the jury Jos Gusing and Teun van de Sande, winner of the Wim van der Hoek Award 2020

The trophy is shaped after the so-called parallel-slit mechanism. When the screw on the lower-right is turned the mechanism will move allowed by the elastic hinges. The geometry has been chosen such that the 2 edges of the parallel-slit (middle upper position) will move in parallel very accurately. This principle is applied in many sorts of precision equipment and products.

at 16:15 on the last day of the Precisiebeurs Precision Fair in the Brabanthallen Den Bosch. The nominees, their parents, supervisors and fellow students are cordially invited. In the afternoon at 12:30 we invite the nominees and their graduation supervisors and the jury at the stand of the DSPE for a lunch together. You will receive a personal invitation in October.
